Dowsen Bags Made for passion!

Company Introduction:

Established in 2003, Quanzhou dowsen Bags Co., Ltd. specializes in high-quality outdoor and sports bags. With over 30 years of experience, we are a trusted partner for leading brands across Europe, America, and Australia. We have served clients with products for major events, including the Tour de France, UEFA European Championship, and the 2024 Paris Olympics, delivering solutions that align with rigorous standards and brand values.

Quality Assurance:

We prioritize quality with premium materials and strict control measures. Our products undergo rigorous testing for durability, load-bearing capacity, colorfastness, and water resistance. We ensure compliance with international safety standards, including California Proposition 65 and REACH regulations.

Innovation & Customization:

We drive innovation with our team of 10+ R&D professionals, exploring new materials and designs. Our efforts have led to 5 patented solutions and numerous product enhancements. We offer bespoke designs and modifications, working closely with brands to meet their exact specifications and market demands.

About dowsen bag

Established in
2003

2500
Square meters production
workshop

7 Production lines

Capacity to deliver up to
100,000 Units per month

Sustainability:

With the growing emphasis on sustainability, we have integrated eco-friendly practices into our production processes. Our products, such as the canvas cooler bags with UV-protected TPU liners, are crafted with environmental responsible materials, allowing brands to meet consumer expectations for green products.

Compliance & Reliability:

Understanding the importance of compliance in European markets, we strictly adhere to all relevant industry regulations and standards. Our reliable logistics network ensures timely delivery, safeguarding your brand's reputation for dependability.

Thank you for considering dowsenbag as your trusted manufacturing partner. We are eager to collaborate with you to enhance your brand's success through our expertise, innovation, and unwavering commitment to quality.

FROM BOTTLES TO BACKPACKS.

Material Origin
Recycled PET Bottles

Source discarded PET plastic bottles from certified recycling facilities. These bottles, once used and thrown away, are collected, cleaned, and prepared for a second life.

CARRY THE FUTURE: SUSTAINABLE BAGS FOR A GREENER PLANET.

Eco-Friendly Materials Overview:

Our outdoor bag series is crafted using environmentally responsible materials in collaboration with **Fujian Baichuan Resource Recycling Science & Technology Co., Ltd.**, one of China's leading eco-friendly fabric suppliers. The fabric is made from **recycled polyester (RPET)**, sourced from post-consumer plastic bottles, significantly reducing plastic waste in landfills and oceans. This high-performance material is not only durable and lightweight but also water-resistant, making it ideal for outdoor activities.

We utilize non-toxic, **water-based dyes** for vibrant colors, minimizing harmful chemical use in production. The lining features **organic cotton**, certified for its reduced environmental impact, and the zippers and hardware are made from **recycled metal** for durability and circular material use.

Through this partnership, all materials are crafted from renewable polyester, contributing to a significant reduction in **wastewater, CO2 emissions, and electricity consumption** during production. Our commitment to sustainability ensures we reduce the carbon footprint without compromising the quality and functionality of our bags.

TRASHED

TREASURED

ENGINEERED FOR THE SUMMIT.

BUILT FOR THE PLANET.

A technical hiking backpack made with recycled materials—designed for serious trekkers who demand performance, comfort, and sustainability at every step.

CM-ISPOOB01

■ GREENCORE 45L HIKING PACK

MATERIAL | Recycled PU coated Fabric
SIZE | 31L*20W*57HCM

COMFORT THAT LASTS; DURABILITY THAT ENDURES.

Designed for long treks with padded, adjustable shoulder and waist straps for optimal weight distribution. Made from high-performance, recycled fabrics that resist tears, water, and abrasion.

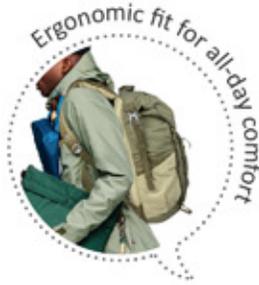

Short-hike Backpack

GO LIGHT. GO GREEN.

Sustainable design meets everyday hiking needs—durable, lightweight, and responsibly made.

CM-MGCOB05

■ GREENCORE 30L ROLLTOP PACK

MATERIAL | Recycled PU coated Fabric
SIZE | 30.5L*20W*55HCM

BREATHABLE COMFORT MEETS SUSTAINABLE DESIGN

With engineered mesh back panels and airflow channels, this backpack keeps you cool and dry on tough hikes. Made from high-quality recycled RPET fabric with eco-friendly dyes, it offers durability and sustainability in one.
